NEW DIMENSIONS IN CAPABILITY

electron plus 3

NEW DIMENSIONS IN CAPABILITY

The Electron Plus 3 provides Acorn Electron users with a faster, more flexible alternative to cassettes for the storage of programs and data. The Plus 3 is a self contained disc interface and 3.5 inch single sided disc drive, providing the user with over 300 Kbytes of storage and the new powerful Acorn Advanced Disc Filing System (ADFS). ADFS provides easy to use facilities at the basic level but also has features making it ideal for business use.

3.5 inch discs are a robust, reliable and compact storage medium with metal protection shutters for the magnetic surface and built-in write protection tabs. These rigidly cased discs are rapidly becoming the recognised alternative to 5.25 inch floppy discs.

The Plus 3 connects to the Electron by the expansion bus and is secured by two substantial screws. The 'L' configuration of the Plus 3 brings the disc drive to a convenient position and makes the expanded Electron a compact, rigid, easily transportable unit. The Plus 1 expansion module can be attached to the rear of the Plus 3 giving the double advantage of instant access to applications programs such as VIEW and ViewSheet on ROM Cartridge and very high speed data or text storage on disc. A second expansion socket on the Plus 3 allows the connection of a further disc drive, this can be either 3.5 inch or 5.25 inch.

The Electron Plus 3 comes complete with full instructions and a disc containing demonstration software and utilities programs.
