Program Summary

Database: This memory based database from Gemini, which uses machine code to optimise the memory available and improve processing speed, includes the following features:

Records are presented as a completely user-definable card on the screen, with up to 15 fields of data. Main routines provide the facility to add, modify or delete records, to sort the entire file by any record, and comprehensive searches may be performed using combinations of any fields. Results of searches may be screened or printed as a summary of up to six fields, or as complete records. Calculations allow field contents to be derived from a number of other fields, which may be used for example, to give total, average, etc.

Strongly recommended as an invaluable program for home, business or educational requirements.

Mailist: Gemini's Mailist program will enable you to keep a record of names and addresses and then print, examine, sort and find them, all with special selection techniques. All our mailists contain our exclusive 'SEARCHKEY' system, giving you the option of creating your own dedicated coding system for each name on file. For example, on most mailing list systems, you are only given the standard heading such as name, street, town, country, postcode etc. With the Gemini searchkey system, you could find, say, all names on the file that are companies having a turnover in excess of '50,000' or all names that are subscribers who are behind in their subscriptions or all names that are eligible for a Christmas card this year!

A full and useful range of routines is included in the menu, and the program allows you to set up your own format for printing labels, i.e. the tab settings you require and spaces between labels, etc. Multiple copies can also be printed.

Random Access Mailist: As above, but with extra features including: maximum 2,000 records, full text editing 3 labels across.

Spread Sheet Analysis (Beebcalc): Perhaps the most commercially successful item of business software yet written, the Gemini Spread Sheet processor offers a very wide range of invaluable calculation and editing features.

Consider, for example, a Cash Flow forecast containing rows and columns of figures, combined with text and numbers. If say, the cash receipts for January need to be changed, it would normally be necessary to delete and recalculate several figures for each successive month.

With BEEBCALC, however, an 'on screen' amendment to the January figure is made, and the corrected figures for each successive month automatically appear upon touching the 're-calculate' key.

Formulae cells in the table may be specified which relate to each other and then copied RELATIVELY or ABSOLUTELY to other parts of the program, which in itself is modular, and directly linkable to other Gemini programs. BEEBCALC has a complete range of inbuilt data entry and formatting techniques, and the structure of the table may be amended at any stage. Of course, full printer facilities are included which allow for either the table to be printed or just the data and formulae relating to the table. Another important feature, any valid BBC BASIC formula is acceptable as a data entry making the system immensely powerful and versatile. BEEBCALC's sister program, BEEBLOT will take data from disk or tape files created by BEEBCALC to provide data portrayal in graph, histogram or pie chart format.

Home Accounts: Designed as a complete Home Accounting package, this program allows the user to set up a budget for items of household expenditure and compare actual expenditure with budget. A running total of all surpluses and deficits is available both as digits, and in the form of a bar chart. A complete Bank account routine is included, together with suggested expenditure categories such as mortgage, rent, rates, telephone, gas electricity, etc., however, these may be deleted or augmented without difficulty.

Easiledger: Contains routines to enable the small businessman to keep a record of one of the most important aspects of his business — cash flow. EASILEDGER is essentially a debit/credit ledger system which can handle sales, purchase and nominal ledger routines to provide instant management information. Its flexibility lies in its ability to produce account balances instantly for debtors and creditors, together with a record of all transactions, dates and references. A year-to-date summary of sales, purchases, receipts and payments over the twelve month period is also provided, as is a complete INTERACTIVE bank account database.

EASILEDGER is a management aid software tool and is designed to run alongside an existing accounting system. If you operate a cash based business and require a complete accounting package to produce the accounts to trial balance and beyond then we recommend you consider using both the Easiledger and Cashbook programs together.

Stock Control: You have a stock of products. With the Gemini program you may enter details of each product on to a record card on the computer with details of your own existing part number (if any), a description of the product, the unit quantity (i.e. one, a gross, a pair, etc.), the cost price per unit, the selling price per unit, a specified minimum satisfactory stock level, units in stock ordering quantity and supplier details.

The program will allow you to enter stock received, stock out, and will also give you a summary of stock items and current holding, together with details of total cost of stock, total sales value of stock, current gross margin on stock, cost of bringing stock up to minimum level, understocked items, etc.

Each stock item has its own computerised record card and you may browse through the file as a whole, or just a specified number of records. An extremely

powerful program, highly recommended for inventory control in small and medium sized businesses.

Invoices and Statements: The Gemini INVSTAT program greatly reduces the time and cost of preparing Invoices and Statements by storing essential information such as customer names, addresses and account numbers, VAT routines and footer messages such as 'Please remit by return', 'Overdue and outstanding', etc.

Not only are Invoices and Statements produced more quickly and accurately, but pre-printed forms for them are eliminated since the INVSTAT program produces professionally formatted documents using your own printer.

Cashbook: Gemini's CASHBOOK is a complete 'stand-alone' accounting software package for the cash based sole trader/partnership business. It is designed to replace your existing cash book system and will provide you with a computerised system complete to trial balance.

Simple to use, this program will replace your manual cash and bank records and provide vital management information at any time. It will take you from sheaves of invoices and cheque book stubs to trial balance, and may, if desired, be used in conjunction with the Final Accounts and program.

Typical information from CASHBOOK is as follows:

1. Summary of VAT information to enable completion of VAT returns.
2. Cumulative receipts and payments report analysed over the standard profit and loss and balance sheet headings.
3. Option for departmental analysis of sales and purchases.
4. Printout of all transactions, nominal account balances etc.
5. Journal routine for entering transfers between accounts and year end adjustment for debtors, creditors, etc.
6. Trial balance.
7. Full audit trail facility.

This program is recommended not only for businessmen, but also for practising Accountants for use in the preparation of Accounts from incomplete records; a printer is essential.

Final Accounts: Requires Gemini 'CASHBOOK' module (except Commodore 64 version)

This program will take data prepared by your Gemini Cashbook module and produce a complete set of accounts for you in the following format:

1. Trial Balance with inbuilt rounding routine.
2. Notes to the Accounts.
3. VAT summary.
4. Profit and Loss Account with comparatives facility.
5. Balance Sheet with comparatives.

All reports may be produced at any time interval comparing actual to budget if required.

Graph Plot (Beebplot): Written specially for use with the BBC micro, this program makes full use of the high resolution colour graphics to provide an easily assimilated visual representation of numerical data.

For example monthly sales statistics comparing two year's results may be instantly converted into two side by side pie charts, histograms or graphs... for easier visual comparison and assimilation.

REEBLOT also incorporates a built-in machine code screen dump, enabling a high resolution printed image to be produced using an Epson or similar bit image compatible printer. It also interfaces with other Gemini programs such as Beebcalc and Cash Book and is particularly recommended where any kind of mathematical plotting facility is required.

Word Processor: This program provides many routines found in large and more expensive packages. With a typical word length of 5-6 letters it allows for up to 1000 words in memory at one time and is ideal for the user who wishes to write any kind of business letter on a home computer.

Features include: block delete, block insert, search and replace, edit text display text, and many more.

Payroll: Handling most of the Payroll problems for up to 50 employees, this program is user friendly being menu driven, easy to use and supported by comprehensive documentation.

It shows gross pay, net pay and overtime for hourly, weekly or monthly paid employees, and holds most PAYE and NHI data together with essential SSP information.

Payrolls are automatically analysed under departmental heads and the most frequently used PAYE forms such as P14, P35 and P60 printed when required.

VAT File: is a program written only for the Commodore 64 at present which is designed to benefit most VAT registered businesses. It is also designed for those users who are on one of the special retailers schemes for VAT, which requires them to analyse their expenditure invoices over the various rates of VAT, in order to calculate their VAT output tax. Please consult the CBM 64 program leaflet for fuller details.

Report Generator: Requires Database C.1801 and allows you to present and print database data in user defined formats so as to:-

1. Re-arrange your record layout to meet specific printed requirements.
2. Create sets of mailing list labels from database records, up to three across your printer.
3. Create documents inserting merged fields into text, just like the expensive word-processors!
4. Design field summaries for column presentation of data, and total any given column.
5. Create any number of standard documents from one database file.

GEMINI COMBINA

Designed to offer maximum value to the serious business or home user by combining several programs on one cassette or disk.

Beautifully packaged with full colour covers, these packs contain a selection of the most popular Gemini programs and manuals.

Combination Business Packs 1 and 2 are designed to appeal to commercial users of the BBC 32K and together contain the ten programs needed to cover most accounting and management tasks in a medium sized business. Pack No. 3 is for the Electron and represents excellent value for money for smaller business users.

Combination Home packs are for the more serious domestic user who wishes to use the facilities of a Home Micro to improve household management. From deep freeze inventories to household accounts and mailing lists, these Gemini programs will improve efficiency within the home, and bring the family closer together in devising new ways of using this exciting and imaginative software.

**ALL FULLY MICRODRIVE
COMPATIBLE**

DATA

GEM

The Definitive Random Access, 24K ROM based Database Management System for the BBC Micro.

R. 0101 £129.95 (VAT incl.)

Now compatible with most double density DFS's

The BBC Microcomputer has certainly made its mark as being one of the finest and most versatile machines on today's market. With so many individuals and organisations now exploiting the advanced features that it offers, including many government departments, schools, hospitals and businesses, Gemini have sought to provide a powerful Database Management System which does not compromise its capabilities by allowing use with cassette tape. The DataGem ROM system, having taken over three man-years to complete, takes full advantage of the mass storage capabilities of floppy disks and will not work with tape systems.

Let's look at some of the features that the program can offer you, and how it goes about its business as an information storage and retrieval system.

Firstly, just think of the many applications to which you could put a card index system to work. Here are some examples for various situations:

Business

Personnel Records
Mailing Lists
Personalised Letters
Stock Records
Product Costing
Video Cassette Libraries
Invoicing
Sales Order Entry
Price Lists
Lawyers
Doctors
Dentists
Insurance Broking
Customer Records
etc.

Home

Record/Cassette Collections
Freesat Contents
Recipes
Library Index
Software Catalogue
Genealogy
Stamp Collections
Video Library
Photo and Slide Records
Home Budgeting
Household Inventory
Greetings Card Lists
etc.

School

Pupil Records
Exam Results
Course Material
Suppliers
Maintenance Records
Stock Records
Computer Education
School Reports
etc.

The System Comprises:

- 2 EPROMs mounted on carrier board containing 24K of 6502 optimised machine language. Carrier board may be inserted in either of two positions under keyboard or in sideways ROM board.
- Demonstration applications disk in both 80 and 40 track format with documented examples of DataGem files. Disk contains no DataGem program code.
- Full colour packaging consisting of A5 ring binder with professional documentation, user registration card and quick reference card.

4. Utility program named 'Trans' also supplied to allow transference of data files from all other Gemini databases.

- Allows searches on any field or COMBINATION of fields to ANY depth.
- Up to 9 subsets of data INSTANTLY available and saved to disk automatically.
- Sorts alphabetical or Numeric on any field, ascending or descending with NO LIMIT on the depth of sort.
- Interfaces with 'VIEW' and 'WORDWISE'.
- Includes a free format report generator for a completely flexible printing format.
- Allows the user to extend the file or add fields after having started to enter data.
- Allows up to 5100 User Definable Records with up to 62 fields per record and a maximum file size of at least 10 Megabytes.
- Permits just ONE file to exist over FOUR floppy disk drive surfaces.
- Offers a free format printed screen which scrolls 120x120, and supports extensive mathematics.
- Provides User defined field relational variables and multiple and single character wildcards.
- Exists self contained on ROM, and does not require additional utilities on disk.
- Finds the occurrence of a string or partial string in ANY field in the database with just one command.
- Customised Masking disk design service available for commercial and professional users.

“ DataGem provides many of the Spreadsheet facilities of an item like Lotus 1-2-3... Combined with a Word Processor, it forms the basis of a very competent small business system. ”

Personal Computer News — July 1984

“ DataGem stands out in terms of both price and performance. Excellent if you can afford it. ”

Acorn User — December 1984

Gemini Integrated Accounting

for the BBC Micro.

£99.95
per module

STOCK CONTROL
Full stock information for 980 part nos. on 40 Track or 1980 per 80 Track disk.

INVOICING & SALES LEDGER
Produces Invoices and Statements holds complete customer information - 135 on 40 track 610 on 80 Track.

NO SECOND PROCESSOR REQUIRED

PURCHASE LEDGER
Maintains complete file for each supplier - 135 on 40 Track or 610 on 80 Track disk.

NOMINAL LEDGER
The central module which can also be used as a 'stand alone' Cash Book. Contains 143 Nominal Accounts, prints Profit & Loss Accounts and Balance Sheet.

PAYROLL
Holds full employee information produces pay slips for 98 employees (40 Track) 198 (80 Track.)

INTEGRATED ACCOUNTING

for the BBC Micro.

Designed for the small to medium sized business user, where speed and efficiency are vital. Gemini Integrated programs are suitable for sole traders, partnerships or limited companies. All require a BBC B 32K microcomputer, and an 80 column printer. A double disk drive with an Acorn compatible DFS is required for integrated accounting purposes. A single disk drive may be sufficient where modules are used independently, although this is not recommended for the Sales Ledger and Invoicing module. The manuals indicate the system capabilities for various disk drive combinations.

Why Integrated Accounting?

Because it will retrieve information stored in one program for use by another and store data in one program which has been generated by another.

PRE-PRINTED...

Continuous Invoices, Statements, Remittance Advices and Payslips available.

Demo Disk £5.00

Why Gemini?

Because our business software for the BBC Micro is based upon the solid foundation of experience. Not only are three of our Directors Chartered Accountants, but we have also successfully written business software for the BBC Micro since it was first launched.

“ Gemini have produced a superb product... a superb example of The Programmers' Art! ”

A & B Computing, December 1984

COPIES OF THE FULL REVIEWS ARE AVAILABLE UPON REQUEST.

Full details of each program in the Suite are available by asking your Software Dealer for our fully descriptive leaflet... or contact Gemini direct in the event of any difficulty.

Serious Software for the

AMSTRAD

CPC
464

CASSETTE

£19.95

DISK

£25.95

Beautifully packaged and documented, these exceptional programs promise to become 'best sellers' for all Amstrad stockists, and are confidently recommended as 'State of the Art' software for this popular, competitive home micro.

DATABASE MANAGEMENT SYSTEM

Unless the data storage capabilities of your Amstrad with this powerful database program from Gemini, the market leaders in home computer software!

Your CPC 464 Database will allow you to store, retrieve and manipulate data in a variety of useful ways — just as you would with a manual card index system, but with extra capabilities, such as:

- Set up your own user-definable card layout in 40 or 80 column mode.
- Up to 20 fields allowed, each with 160 characters — to a maximum of 1000 characters per card. Up to 999 records available, making full use of the CPC 464's memory capacity.
- Extensive mathematical and field relational expressions may be used, including totals and averages.
- Quickly sorts alphabetically or numerically, even names by surname if required, with or without case discrimination. Sorts may be performed on subsets of records on ANY field.
- Integrates with Report Generator (available separately) to produce standard mail-merged form letters, mailing labels up to 3 across page etc.
- Change record format at any time, add or delete fields after set-up.
- Completely user-definable field summaries available to both screen and printer — 40 or 80 column display mode.
- Delete records.
- Browse with instant edit/print/delete options.
- Simple menu-driven operation.
- Utilises machine code routines — no long 'garbage collection'.
- Files may be merged enabling the appending of files without tedious re-typing.
- Superbly documented in an easy to understand style — just as you would expect from Gemini!
- Comes with two documented demonstration files to show the extensive capabilities of the software.

REPORT GENERATOR

Requires Gemini CPC 464 Database Program No. C.1801 and Printer)

This program will allow you to present and print your Gemini Database data in formats that you design yourself on-screen.

Look at some of the ways in which you can use it:

- Re-arrange your record layout to meet specific printed requirements.
- Create sets of mailing list labels from database records, up to three across your printer.
- Create documents inserting merged fields into text, just like the expensive word-processors!
- Design field summaries for columnar presentation of data, and total any given column.
- Ideal for mail-merged standard letters.
- Create any number of standard documents from one database file.

- Will even right-justify documents, automatically adjusting for variable length merged data.

Technical Details

RECORD MODE: 1600 characters of text available, including field data. Headers and Footers may be entered when using printer paging option.

MAILING LABEL MODE: 1-3 labels across page, with automatic compacting of lines to sequence the printer.

DOCUMENT GENERATOR MODE: 3200 characters available per document, with merging of up to 20 fields in any position on document. Any field may be used more than once. Automatic justification.

FIELD SUMMARY MODE: Up to 20 fields may be specified, maximum of 160 characters each.

HOME ACCOUNTS

The Gemini Amstrad Home Accounts is a suite of two programs offering comprehensive management of home finances. It is quick and easy to use and includes the following main features:

- Computer aided budget design.
- Up to 30 expenditure allocations.
- Financial year may start with any month.
- Amendments to budget at any time.
- Up to 24 characters per transaction.
- Automatic warning if bank charges likely.
- Forecasting of balances and expenses.
- Bar charts of budget/actual income/expenditure.
- Various printer routines.
- Powerful search routines including:
 - Date, or range of dates
 - Allocations
 - Transaction details (specific name)
 - Credits
 - Combinations
- Simple to check account totals and running totals against budget at any time.
- All account entries sorted into date order if required.
- Simple amendment or deletion of entries.
- Date entry validation.
- Full summary by allocation.
- Four types of monthly summary.
- Automatic entry of standing orders.
- Plus more...!
