

Oberon International

OMNI-READER

£ 59-99

*Including VAT, Postage and packing
please allow 28 days for delivery.*

The Omni-Reader is a new and easier alternative to typing in data. By using advanced character recognition techniques the Omni-Reader can read printed text and send it to the computer as though the information was coming from a modem.

The vast majority of office correspondence can be read by the Omni-Reader which supports the four major typescripts used. These are Courier 10, Courier 12, Letter Gothic and Prestige Elite. To enter a page of text you place it under the special Omni-Reader ruler and read the text with an electronic eye. A small computer within the Omni-reader then translates those images into standard ASCII text.

Any computer with a standard RS232 port can make use of the Oberon Omni-reader, all you need is some communications software and the cable for your computer.

Cables available for BBC Microcomputers, Sinclair Spectrum 128 and Spectrum +2 with machine specific instructions. Only £11.75

Cable and simple terminal software available for Atari ST. Only £19.99

Amstrad CPC Interface, cable and software. Only £25.00.

Standard RS232 cable for IBM and Apricot only £14.95.
