STUDIO 8 — The sound studio

This pack contains more than 20K of machine code and converts your BBC micro into a four voice synthesiser with an eight track digital recorder and a rhythm and drum machine.

- Select any one of the 32 instruments by name. Play them from the keyboard with sliding fader controls for level mixing
- Set keyboard to auto-sustain, mono or polyphonic, with optional split-keyboard operation
- Play the keyboard; alter the tonal effects; see the amplitude pulsate on the sliding faders
- Build up a drum backing on the drum machine
- Build up a rhythm accompaniment on the rhythm machine
- Synchronise the two
- Set the 8 track recorder to record, and watch the digital tape counter
- Record a few bars on the 8 track tape simulator and play it back
- Use the studio mixer to add an accompaniment from a different instrument played in real-time on the synthesiser

- Press "Rewind"; watch the tape indicator
- Press "Stop" at any point: then press "Play" to hear the mix

This is a truly exciting real-time studio system which will give hours of entertainment. It does not require musical proficiency and will addict you with its ease of use and amazing results.

Simple instructions are given to add an external speaker and keyboard.

Examples of the music that can be created with STUDIO 8 are included on the disc/tape.

OTHER FEATURES INCLUDE

- **Envelope definer** — 16 envelopes may be defined using a full screen editor; and may be slowed down for analysis
- **Instrument definer** — define up to 32 instruments with up to 16 envelopes accessed by name
- **Music editor** — A full screen editor to edit music recorded on the system. Includes printout facility

NEW

TOOLKIT PLUS — 16K Basic programmers aid

A Very Special Program

In the two years since its launch Beebugsoft's Toolkit has been chosen by many thousands of BBC users and established a reputation second to none. The launch of our new second-generation Toolkit is therefore something rather special.

Toolkit Plus is a 16K Rom which has been written from scratch making use of the latest skills and programming techniques. It offers over 40 commands (grouped for ease of use) and some new and very exciting features, all of which may be called directly or from a menu.

TWO SPECIAL FEATURES

Syntax Checker

The test of its kind on the BBC. As you key in your program, Toolkit will draw your attention to syntax errors that may otherwise seem to light only after many programmes.

Basic Editor

A powerful full screen editor, compatible with various stand alone Basic editors.

OTHER FEATURES INCLUDE

- **Autosave:** save your program regularly at the press of a key
- **Psave:** partsave any section of your program
- **Xref:** displays the values of variables, arrays, functions, procs, etc. and the line numbers on which they occur.
- **Format:** disc formatter ... one command can format both sides of your disc
- **Slomo:** control the speed at which your programs run
- **Roms:** display & enable/disable the Roms in your machine
- **Crunch:** an amazing Basic program packer. (It removed 4,500 bytes from the original Masterfile II)
- **Search:** new and extremely flexible search & replace commands which integrate with the editor.
- **Trace:** output to a window with single step options

These are just a few of the massive armoury of commands provided by Toolkit Plus to streamline computing on the BBC micro.

UPGRADE

A trade-in discount of 50% of the original Toolkit purchase price is offered (mail order only) when upgrading.

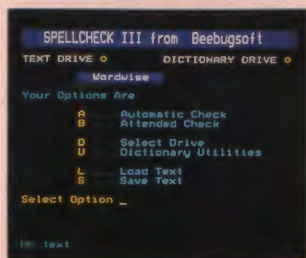

NEW

SPELLCHECK III — Wordwise/View spelling checker

The natural extension to Wordwise (Plus) or View ...
... **even faster with 2000 words in Rom**

SPELLCHECK III is a new release of the amazing Spellcheck program, which provides an automatic spelling check for letters and documents produced on Wordwise and View.

It is now supplied on 16K Rom (including about 2000 words stored in Rom) with an accompanying dictionary disc containing an additional 6000 words. This dictionary automatically accepts new words as you use it and will store well in excess of 17,000 words on a 100K disc.

Spellcheck III is extremely fast, the 2000 words stored in Rom making it even faster than the original Spellcheck II. It is a joy to use.

TEST TIMINGS

1620 Words/Minute with Watford 1.3 DFS.

2000 Words/Minute with Acorn 1.2 DNFs and 6502 second processor.

"Invaluable ... Fast and Reliable"

UPGRADE

A trade-in discount of **£10.00** for Spellcheck I and **£25.00** for Spellcheck II is allowed for existing users wishing to upgrade. (Mail order only). Spellcheck III is compatible with Spellcheck II dictionary disc.

NEW

DESIGN — Computer Aided design package

DESIGN is a screen processor which allows information to be displayed in a format suitable for demonstrations, side projections, handouts or presentations.

Graphs, Pie Charts and Bar Charts are quickly produced on automatically drawn and scaled axes.

Text may be written anywhere on the screen and may be displayed normally, enlarged, underlined or sideways.

Machine code screen dumps are included.

"A first rate screen processor" ... "immense value" EDUCATIONAL COMPUTING

ROMIT — Put your own basic programs into Rom

- Create Your Own Silicon Disc
- A Complete Filing System with up to 16K capacity (per bank of Ram)

ROMIT adds a new feature to your BBC Micro — A Ram Filing System. This provides over 20 new commands which enable you to:

```
>>HELP ROMIT
★RAM      ★SAVE      SAVE
★TRANSFER ★LOAD      LOAD
★SUCCESS  ★SPPOOL   OPENDUT
★DELETE   ★ITITLE   PRINTW
★ERASE    ★HELP     SPITE
★SNAP     ★DOWNLOAD ★END
★RELOAD   ★UPLOAD   ★PAD
★REXEC    ★INFO     ★PRINT

>>RAM
>>INFO
MY PROGRAM L FF1900 FF8023 1CDE B06C
MY DATA  L FF0C00 000000 0100 A223
★BOOT     L 000000 000000 007C A341
★HELP     L 000000 000000 0044 A3D9

End of Rom: &A439 Free bytes: &1CC6

>>PAD
>>DOWNLOAD
Ready to blow ROM data at &1900.
?
```

1. Create a silicon disc with its own filing system commands. Type ★RAM, then you can catalogue the "disc", save and load files to it, storing as many files as memory will allow. ★DISC (or ★TAPE) takes you back to your normal filing system. You will need sideways Ram to use this facility.

2. Put your own Basic or assembler programs (or any files) into Ram and then make them into Eproms. Whether it's your favourite game, your function key definitions or any program that you use frequently, you can now put it into Eprom so that it's always instantly available. Multiple copies can also be produced to enable you to pass on your programs to other people.

Getting your own Basic program into Rom couldn't be simpler. Just load your program into memory and type:

```
★RAM ★TRANSFER "prog" ★DOWNLOAD
```

and either connect it to a blower, or send the disc (or tape) to us, together with your RomIt registration number, and we will Rom it for you. (There is a small charge for this service).

3. Use your sideways Ram as a printer buffer so that you can continue to use your computer for other work at the same time as printing long documents.

OVER 20 NEW ★COMMANDS ARE PROVIDED BY ROMIT

An Eprom Blowing Service is offered with this pack.

To get the most from RomIt you will need sideways Ram fitted to your computer, eg just a single Ram chip plugged into your ATPL (or other) Rom board.

NEW

SLEUTH — Debugging tool

Looking for bugs in your Basic?

Let SLEUTH track them down

Single step through your Basic Program
with Dual Screens!

Dual screen memory

instruction.

SLEUTH'S FEATURES INCLUDE

- **Single Stepping through Basic** — one statement at a time or a block (e.g. procedure) at a time.
- **Dual Screen Operation** — flip between your program screen and SLEUTH's control screen.
- **Breakpoints** — pause your program at any preset line number, or on the state of any variable.
- **Accelerator** — adjust the speed of your program from full speed to freeze frame.
- **Full Feature Control Screen** — monitor and update vital aspects of your program as it runs.
- **Trace** — a sophisticated line trace facility operating when program runs.
- **Variables** — constantly monitor variables as the program runs.
- **Free memory** — constantly monitor free memory.

"Extremely clever and useful"

HOME COMPUTING WEEKLY

"Unique debugging aid"

EDUCATIONAL COMPUTING

ICON MASTER — Icon control system

GIVE YOUR PROGRAMS THAT PROFESSIONAL TOUCH

This pack automates the creation of an icon-driven user interface. It allows you to design a screen containing icons and then use it in your own programs, in place of a normal menu.

It is easy to use and may optionally be controlled with the AMX mouse. Icons (sample sets provided) are designed on a special screen editor and are compatible with AMX icons.

You then select the editor and design your final screen by positioning your icons and text wherever you choose. Icon Master then generates the code to append to your Basic program which will reproduce your icon screen and handle user input.

This screen shows how you might create a front end for a database program.

Icons may be created on this screen.

NEW

SPRITES — A game writer's utility pack

A game writer's utility pack which allows high speed arcade games to be written in Basic.

This is achieved by using the set of supplied machine code sprite routines to move multicoloured characters (sprites), of your own design, around the screen at high speed.

Sprites are generated in mode 2 on a 8 x 16 grid with the easy to use sprite definer utility, and may include any of the available 16 colours.

MASTERFILE II

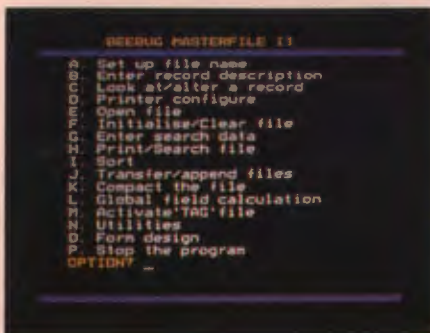

— General purpose database

Combines with Wordwise/View to produce Standard Letters etc.

MASTERFILE is a general purpose file management package allowing large amounts of information to be stored and processed. It is extremely powerful yet flexible and easy to use. Once set up, the information may be retrieved, sorted on any field, displayed, updated, printed etc. as required.

Separate versions of the program are available for cassette and disc users, the disc version using random access files and offering many extra features.

MASTERFILE II FACILITIES (Disc only)

- Extremely fast "tag" sorting on virtually any combination of fields. Any number of tag files may be associated with your data file.
- Flexible print layouts allowing additional text to be combined with the output to produce standard letters etc.
- Output from MASTERFILE II may be spooled directly to a file for later use with WORDWISE or VIEW.
- Flexible data entry.
- Fields may be defined as numeric, string, decimal or date and up to 255 characters in length.
- Spreadsheet type facilities allowing global changes to be made on string, numeric and decimal fields.
- Sub-files may be created from selected fields and records, from the master file, according to most criteria.
- Extra utilities to delete a field throughout a file, copy file descriptors and change dates.

TECHNICAL SPECIFICATION

The cassette version will allow up to 10 fields per record. Any number of files may be set up and each will typically hold 110 records (based on a 5 field record).

The disc version will allow up to 17 fields per record and each field may be up to 255 characters long (limited to 1 screen per record). File size is only limited by the disc capacity — typically using 5 fields 2000 records may be held on a 100K disc.

UPGRADE

A trade-in of 50% of the original tape/disc price is available when upgrading.

EXMON II — Machine Code Monitor with Dual Screens

EXMON II adds 60 powerful commands to the BBC Micro.

Now if you are debugging a game, or any other program with a visual display, you can single step through it Instruction by instruction and actually watch the effect on the screen.

You can also revert to the monitor screen at the press of a key to examine registers, edit code, read variables, alter memory etc., and then switch back to your display screen and continue running (or single stepping), without losing your display.

If you are interested in using the BBC assembler as a beginner or an experienced user, or would just like to have facilities like Disassemble, Move Memory, Verify . . . instantly at your fingertips, then EXMON II is about the best you can buy.

Notes

EXMON II uses just over 1K of workspace for screen storage (if you wish to use the dual screen facility). This workspace is relocatable by the user, and may even be located in sideways Ram.

EXMON II is available only on Rom. BBC cassette versions of EXMON I are still available. EXMON II is supplied with a quick reference guide.

EXMON on the Electron

EXMON I is available for the Electron on cassette.

Upgrade

If you have EXMON I on eeprom, and now wish to upgrade to EXMON II, please return it to us to receive a discount.

FIVE SPECIAL FEATURES

- Dual screen facility allows you to switch between EXMON's control screen and your own screen.
- Full screen memory editor.
- Full debugging with breakpoints AND single-step facility.
- EXMON II is fully interactive — all data and addresses can be entered as hex or decimal values, or as expressions including the use of Basic variable names and Assembler variables and labels.
- RELOCATOR — relocates machine code adjusting it to run at the new address.

"Exceptionally comprehensive"
YOUR COMPUTER

"A very worthwhile product"
ELECTRONICS COMPUTING MONTHLY

HELP II — The Information Rom

THE USER GUIDE IN ROM

The Help Rom, which provides comprehensive on-screen information to aid programming, has been supercharged. It is now supplied on a 16K Rom and contains 28,000 characters of text to help you when you get stuck for a command or its syntax.

Help II will save hours of your time and remove the necessity to wade through user guides. Just plug it in, and every time you get stuck for a piece of information simply type, for example, ★H Print, ★H OPT or ★H FX.

28,000 characters have been crammed into Help II, which provides comprehensive information on a vast range of subjects including:

- All Basic Keywords including Negative Inquiry, Screen modes, Rich table, Teletext table
- All VDU Codes
- All +FX & Obyte Calls (inc. B+))
- All Command Calls
- All + Commands
- All Vector Addresses
- Memory Usage
- Disc Icons
- Assembler including All Op. Codes, Traps ASCII, Address Modes etc.

An upgrade from HELP to HELP II is available. Telephone for details.

NEW

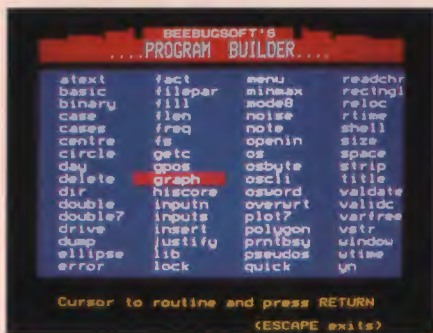

PROGRAM BUILDER — 60 handy basic routines

Program Builder brings you over sixty complete routines ready to use when writing your own Basic programs. Why waste time writing frequently used code when you can rely on professional routines written for you, that will work first time.

Program Builder offers over 60 functions and procedures which may be combined with your own Basic program. They are all fully documented and use standard variables to ensure that they will be compatible with your work.

A wide range of topics are covered by Program Builder, which is fully automated. Just select the desired routine from an on-screen menu and the code will be automatically added to your program.

Any number of routines may be put together in a single program.

There is not the space to list all the routines in Program Builder but here is a small selection to give you an idea of its range:

- Input & validate data
- Binary from decimal
- Menu & return input
- Special sound effects
- Strip spaces
- Text any size/height/angle
- Double height text any mode
- Graphics printing
- Circle plotting
- String entry/justify/insert
- Plot ellipse
- Quicksort
- Screen dump
- Password
- Mode 7 graphics
- Yes/No input
- Text justify
- Print string vertically
- Browse/ending
- A new mode
- Mode 8

NEW

BILLBOARD — Scrolling display pack

BILLBOARD is a unique pack which enables you to use your BBC Micro to create scrolling displays of text and pictures in mode 2. It is ideal for home, education, business or anyone wishing to display information in an interesting and eye-catching way.

Your message is entered using a special screen editor and may be up to 4,000 characters long, in any of the 16 colours (including flashing). It can be displayed using special shadow characters, in any of 18 different sizes.

The message will automatically re-display itself continuously, even if Break or Ctl/Break is accidentally pressed.

A special facility allows you to link two BBC's via the RS423 ports and have your message and pictures scrolling across two machines providing a most impressive display.

The whole program is menu driven and allows text to be loaded and saved to disc for later use.

QUICKCALC

 — An easy-to-use spreadsheet

QUICKCALC is an easy-to-use, yet powerful spreadsheet supplied on cassette or disc. It will bring sophistication and computing power to a wide range of different number-based activities.

Use it for your personal accounts, school marks, stock control, sales, VAT, and general financial planning. It allows rapid and automatic calculation of all kinds, and permits forward planning and "what if" analyses to be effortlessly performed.

QUICKCALC offers load, save, print, goto, replicate, histogram and many other features and is supplied with a comprehensive manual and function key strip.

"A very neat utility"

MICRONET

TELETEXT PACK

 — Teletext editor and tutor

The TELETEXT EDITOR enables colourful mode 7 screens to be quickly created, for use within a program (e.g. an attractive title page) or just for display.

Powerful utilities, including a graphics character definer, speed up screen design and creation.

The function keys are used to select all colours or special features and a key strip is provided for ease of use.

Screens may be loaded or saved in the normal way, or specially saved as a Basic routine, which may then be simply inserted into your own program.

"Good cheap sheet . . . excellent manual"

ACORN USER

BEEBUG STARTER PACK

— A first rate introduction to your computer

- A Comprehensive Manual ● 7 Explanatory Articles ● 25 Hints and Tips ● 5 Function Key Strips ● A Quick Reference Guide (BBC only) ● Screen Planning Sheets ● A Character Planner ● A Cassette or Disc containing: 5 Utility Programs and 7 Games Programs.

This is the ideal companion for anyone new to computing or learning about the BBC Micro/Electron. The pack has been compiled by BEEBUG (the User Group for the BBC Micro) and draws on their experience with the machines and the feedback from over 25,000 members.

A comprehensive manual introduces you to various aspects of computing and how to program in a series of carefully explained articles. 25 of our most useful hints and tips are also detailed in the manual, which is accompanied by a number of handy function key strips and a 6 page quick reference card (BBC only).

"One of the best starter packs I have seen"

ACORN USER

HERSHEY CHARACTERS

— Font generator

A host of new fonts from your own program.

1500 new characters are supplied ready to be used with your own program. Simply choose your characters, specify how you want to use them and this flexible utility spools out a routine for you to append to your own program.

Whole lines of text may then be automatically written at any angle, even with individual characters at different angles and sizes. Text may be any colour in any graphics mode, automatically centred and with fixed or variable spacing.

9 new character fonts

A second facility gives disc users a further set of 9 character fonts to be used direct from the keyboard or called up from a user program. A powerful and easy to use character definer allows any character to be redefined as required.

Printer Dump

A screen dump for Epson printers is included with this pack.

"An excellent utility" ACORN USER

Recommended by Linear Graphics as fully compatible with the Plotmate Plotter.

PAINTMASTER — Sophisticated drawing package

Controlled from Joysticks or Keyboard Paintmaster (formerly Paintbox II) is probably the ultimate drawing program for the BBC Micro. Use it to doodle or to design sophisticated full colour pictures.

As well as featuring an "elastic band" cursor, PAINTMASTER will draw in full colour with various widths, and will automatically draw (and fill) circles, triangles etc., and create eight types of vertical or horizontal shading.

The keyboard may be used to insert text anywhere on the screen, using any colour and in any of the eight sizes.

PAINTMASTER may be controlled from joysticks or keyboard and offers an amazing number of features.

"An amazingly versatile tool"

EDUCATIONAL COMPUTING

"a very sophisticated and versatile utility"

ELECTRONICS AND
COMPUTING MONTHLY

MUROM — Sound extension Rom

Create your own tunes and sound sequences with ease, either with Murom's editor and a musical score or by using the Beeb to simulate a piano keyboard.

Edit your own creations with the full screen music editor. Then switch to the envelope editor to tailor the tonal quality and select instrument type. Alternatively select one of the predefined instrument envelopes.

"Well designed and useful"

A & B COMPUTING

Incorporate your music and sound sequences into any program of your own, to play back with or without MUROM plugged in. Playback is interrupt driven and may continue even while you run other programs.

Predefined instrument envelopes may be set up, e.g. ★FLUTE, ★SYNTH etc.

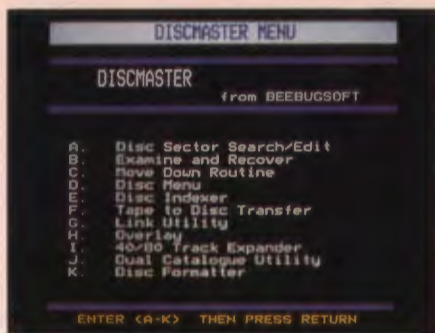

Instant sound effects may be called from Basic, e.g. ★ZAP, ★SIREN, ★EXPLODE etc.

MUROM is accompanied by a full instruction manual and repertoire of music data on cassette.

DISCMASTER — Utilities for the disc user

Eleven powerful utilities to support the disc user, with routines to help with just about everything you'll want to do while using your disc drive.

All programs are called from a main menu and are explained in detail in the comprehensive manual.

• **Disc editor/String search**

A string search routine combined with a full screen editor, simply overtype on the screen (in hex or ascii) to update the disc.

• **Recover**

Recovers programs lost by accidental deletion or disc corruption.

• **Movedown**

The command ★RUN will load, move down and run your long programs automatically, if you add this routine to them.

• **Disc menu**

A colourful automatic menu to add to each of your discs, which will move down and RUN Basic programs, and ★RUN machine code programs.

• **Indexer**

Creates an information index file for all of your discs, which may then be displayed, updated or printed to help you keep track of your programs.

• **Copier**

Transfer a whole cassette of programs onto disc automatically. (Will not copy protected cassettes.)

• **Link**

A utility to automatically call and insert useful routines from your own library into your development programs.

• **Overlay**

Enables procedures or functions to be loaded from disc and overlaid into your program as it runs, allowing you to run programs much larger than available memory.

• **40 to 80**

Insert your 40 track disc, 3 minutes later remove the disc which is now in 80 track format and still has all of your programs on it.

• **Dual catalogue**

Enables 61 files to be saved per disc surface instead of just 31.

• **Format**

A speedy program to format or verify 40 and 80 track discs.

"A godsend to disc users"

EDUCATIONAL COMPUTING

"Some very interesting facilities"

PERSONAL COMPUTER NEWS

DUMPMASTER — NOW IN ROM

The extremely versatile Dumpmaster program is now available on 16K Rom and supports more printers and offers even more features.

Dumpmaster provides fast machine code dumps using up to 8 shades and will accurately copy your screen in any of the graphics modes and even in the teletext mode. It also includes a special 'snapshot' facility to produce screen dumps from a game, or any

other program, at the press of a key (unless protected).

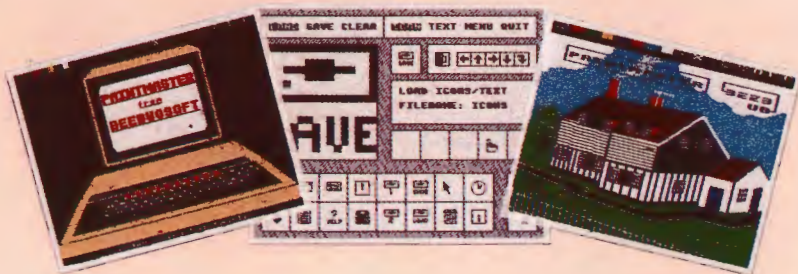

The tape and disc versions create tailor-made dumps which may be called as required or even appended to your own Basic program. The Rom version has the added advantage that it uses up no memory and is always available from a single command. A number of additional features are available on the Rom version, including printing of windows, text dumps and vertical dumps (printer dependent).

NEW

WORDEASE – Wordwise Plus Utility Disc

Fulfil the potential of Wordwise Plus with Wordease.

Wordease will streamline wordprocessing on Wordwise Plus. It provides a number of new applications, such as mail merging and label printing, and some handy programming utilities such as a program compactor and variable display. It also allows you to easily move around segment and text areas at the touch of a key.

WORDEASE FEATURES INCLUDE

- Automatic version number save
- Copy seg. to seg. with "overwrite" and "marked section only"
- Info & auto-load of Wordwise files
- Search & replace on edit screen
- Wordwise function key editor
- Auto-renumber of sections, sub-sections etc
- Indent & sort routines
- Auto-generated printer codes for underline, enlarge, condense etc.
- Program utilities . . . squasher, variable display
- Multi-format label printer
- Powerful mail merge for standard letters

WORDEASE ON ROM

Wordease is now available on Rom, removing the necessity to load the routines from disc each time you use them. It is now even more like a true extension to Wordwise Plus.

Keep this extremely useful set of routines plugged into your computer, where it belongs. Supplied on a pair of 16K Roms.

UPGRADE

A trade-in discount of 50% of the original disc price, is available (mail order only) when upgrading to Rom.

NEW

HOW TO OBTAIN BEEBUGSOFT PRODUCTS

All Beebugsoft products are available from leading dealers throughout the country, including Technomatic Ltd. of London. See dealer list on the back cover for your nearest dealer.

Alternatively you may call in for a demonstration at our new St.Albans showroom. The address is Beebugsoft, Dolphin Place, Holywell Hill, St.Albans, Herts, AL1 1EX

MAIL ORDER AND CREDIT CARDS

For mail order please use the order form on inside back cover and send it to the High Wycombe address. Access or Barclaycard holders may order by telephone on our 24 hour hotline. Telephone Penn (049481) 6666.

OFFICIAL ORDERS

We are pleased to accept written official orders from schools, colleges, government bodies etc, which should be sent to the High Wycombe address, shown on the order form .

SOFTWARE WRITERS

We are always looking for new ideas and programs to add to the Beebugsoft range. Our rates are generous, so if you have any suitable software please write to The Software Manager at the address below.

HOW TO CONTACT BEEBUGSOFT

If you require further information please write to: The Software Manager, Beebugsoft, P.O.Box 50, St.Albans, Herts, AL1 3YS
